

The screenshot displays the Oracle Hyperion Financial Reporting (HFR) interface. It shows a financial statement with multiple columns for different financial metrics and rows for various accounts. The interface includes a top navigation bar with the Oracle logo and menu options. The main area contains a table with data, and there are side panels for filtering and drill-down options.

Account	Period	Balance	Change	Ratio
1000000000	2008-01-01	1000000000		
1000000001	2008-01-01	1000000000

Oracle Hyperion Financial Reporting trasforma i dati aziendali in informazioni operative con la creazione di book di report finanziari di qualità con una varietà di formati per una serie di udienze. Compatibile con tutti i regolamenti di contabilità e requisiti esterni, questi reports, facili da generare, possono essere distribuiti immediatamente o schedulati per migliorare la pianificazione finanziaria, la gestione e il controllo della propria organizzazione. Con un coinvolgimento minimo del personale IT, gli utenti finali possono divulgare informazioni finanziarie vitali. Oracle Hyperion Financial Reporting supporta le applicazioni di Oracle Hyperion Financial Performance Management, Oracle Hyperion Essbase e SAP BW
